Only 9.8cm high, easily passes thresholds up to 2cm high

One of the lowest cleaning robots on the market. Easily fits space under a sofa, wardrobe or bed. The Mamibot ExVac 880S easily passes obstacles such as 1.5 - 2 cm high thresholds or skirting boards.

3in1: vacuum cleaning, mopping and sweeping

Do you have a dog or a cat? Kids came back home straight from the playground? Remember - your home is for resting, not for cleaning! The Mamibot ExVac 880S is equipped with a dust container of 600 ml capacity, which makes it one of the largest options available on the market.

Cleaning completed but floor is still not shiny? No problem! Thanks to wet wiping combined with additional sweeping and removal of fine dirt particles this issue will not bother you anymore. A large 370 ml water tank is sufficient to clean a very large floor area, and electronic water metering feature enables proper cloth soaking to clean parquet, terracotta or floor panels.

Triple-stage dust and dirt filtration

Dust and dirt re-emission is a very important issue, especially for those, who suffer allergy. To prevent this, the Mamibot ExVac 880S robot is equipped with three air outlet filters: a washable pre-filter that retains the largest dirt particles, a sponge filter and a HEPA filter.

Take good care of the quality of breathing air!
